## Cops and robbers jailbreak 2

By Jim Woodruff Updated May 26, 2020 A police officer is a respected member of all communities. Becoming a police officer is a significant achievement and is an honorary position. To find out if being a police officer is the right job for you, you need to look at yourself and decide if your career ambitions and values mesh with the activities of a police officer. Think about the characteristics of good police officers and you will be able to identify signs that you should be a police officer. Let's look at the characteristics of a good cop as described in an article published by Rasmussen College in April 2020, and you can determine if you have these characteristics. Good cops care about people. They want to help others and make a difference in the communities in which they live. The goal is to gain the trust of the people and become a respected member of the neighborhood. Police officers want to help others. It can be something as small as helping someone repair a stranded car or helping the victim of an attack. They like to be part of a reputable team. The police must coordinate with other law enforcement agencies, first responders and judicial officers. They embrace the camaraderie with other officers. Police officers have compassion and empathy. They understand the feelings of others and know how to put this understanding into compassionate action. Do you like working with people? Policing is about dealing with victims, criminals and other police. Being comfortable working with people is the first important requirement to be a police officer. Every day for a cop is different. A police officer's day can include issuing citations, answering emergency calls, patrolling assigned areas, arresting suspects, testifying in court and perhaps even delivering a baby in an emergency. There is no schedule for tasks. Routine conversations do not exist. The police like to meet the unknown. They like that every day is different and brings new challenges. A day in the life of a police officer is rarely predictable. Are you the kind of person who prefers to set routines and activities, and can you deal with the daily uncertainty of police work? Police officers must have good communication skills. These include verbal, nonverbal, vocal tones, facial expressions and physical movements. A police officer must understand that all these types of communications send messages to other people. An intelligent police officer understands the subtleties of each type of communication and knows how to use them in all sorts of situations. Are you able to effectively communicate your thoughts and actions? Police should have awareness of crime trends and surroundings in their patrol areas. They need to be observant and identify things that are not normal and take action to prevent crimes. The police must be able to quickly observe and assess a situation and make decisions. Police officers must be flexible and adaptable. They have to react to individual situations as they evolve. Can you put yourself in a constant of mental alertness where you always look around and be aware of your surroundings? Police officers must have absolute and complete control over their temperament. They must be calm when faced with a storm of verbal and physical abuse when others lose their temper. The goal is to navigate these turbulent waters and find a way to resolve conflicts. Are you the kind of person who can maintain self-control and find ways to deal with explosive confrontations? According to recent data from the Bureau of Labor Statistics, the median salary for local government police officers was \$63,410 as of May 2019. Add attractive benefits and pension packages and you will find that police officers are well compensated. If you begin your career at the age of 20, you can retire after 45 years of service and have time left to pursue a new career. However, the average police officer's salary varies widely by state. According to data from an April 2020 article in Forbes, California pays the highest annual salary of \$105,220, while Mississippi has the lowest at \$36,290. Do you value the process of building a career in law enforcement that can lead to a stable financial future for yourself and your family? If you can answer yes to these questions, then becoming a police officer can be a good career choice. There are many good things about being a police officer that can lead to a rewarding and financially stable life for yourself and your family. After some dry spell on the jailbreak scene, those who want to expand the capabilities of their iOS devices can once again explore these options thanks to evasion 7. A conversation that always comes up even when there is a working jailbreak is – Should I jailbreak? Short answer, yes. TreyDaPrince, iMore Forums Member For Many People, the answer is always going to be yes because they just want all the extra treats that jailbreaking offers. There are many cool themes, apps and only general customizations to enhance the overall experience when using an iOS device, and they like to get deeper into the system so to speak. I personally not Jailbreak- not worth the instability. phreddyl, iMore Forums Member For others though, the answer is always going to be no for many different reasons with the most common is instability in OS that occurs for some people after jailbreaking. I'm a firm believer that everything depends on what you install, but again, it's one of the biggest reasons among users for not jailbreaking along with battery life concerns, whether it's true or not. I don't find jailbreaking appealing anymore. HAWK, iMore Forums Member Personally, I don't jailbreak my devices anymore because I feel like iOS has reached a point where I'm perfectly fine without all the tweaks and themes, but at the same time I have jailbroken devices in the past because I think it's something everyone should experience within reason. I'm not going to suggest it to mom because just wanted to totally scare her. Ultimately, it comes down to whether you are comfortable with the process and have some time to set aside. Things can and do go wrong, which is why we always suggest reading through the guides carefully. If after you have jailbroken and want to go back, it's not really a problem either, provided you made all the suggested backups. If you didn't, the process could be a little more difficult. I know we have a lot of experienced iOS readers out there, do you jailbroken your devices? What do you suggest to those who ask you if they should break theirs? Discuss more in iMore Forums In the creative world there is often a stigma towards paying for help to build your dream. Art loses authenticity, someone feels, or you are simply less of an artist if you need to rent out to get a job done. Authors, for example, sometimes feel that it is cheating to hire a collaborator, or to pay a company to publish their book instead of toiling blindly through the creepy channels of commercial publishing. I can't stress enough how counterintuitive this is! In any creative endeavor, the odds are stacked against your success as it is, and you must be willing to constantly evolve and work hard to give your art every possible opportunity to find life in the world. And you can't do it alone. Because here's the thing: You can't be good at everything. If you're an author, you can't be the one-person army that writes, edits, formats, designs, publishes, and promotes your book. And if you insist on being that person, you should be ok with mediocrity because that's almost certainly all you want to achieve. Let's look at it differently. You are a general entrepreneur and you decide to build your own house. Excellent! But before you can start leading your construction team, hire an architect to develop the drawings; together, fine-tune them. Then comes your role, where over time you will monitor and participate in building the house and managing electricians, builders, heating and air conditioning experts, etc. When the house is finished you will probably hire an interior designer, because as good as you are the home-building, you have no idea what the hell your wife means with the mid-century modern. Finally, a year later, you'll be moved in and happy. You did what you do well to create your dream home, and everyone came together to see out your vision. Is it cheating? No... That's smart. The same wisdom should apply to your creative work. The most pioneering writers are often godly editors. Good producers may not be able to act to save their lives, while most singers and songwriters probably don't know anything about promotion. Your duty is to your art — what you have to offer the world. Leave the rest to the experts. By Clayton Browne Updated July 24, 2018 Each job has some kind of new employee orientation or training. The tutorial can be few days or just a few hours for relatively easy jobs. More complex complex However, sometimes there are briefings or trial periods that last weeks or months. New police officers have a steep learning curve and usually work with an experienced officer for at least the first month or two at work. Police officers are considered a novice for their first year on the job. Working as a real cop is nothing like police dramas on TV. It is rarely obvious who is the villain and who is the innocent bystander. It takes both training and experience to understand how to analyze different situations and respond correctly. Working with an experienced officer helps a novice police officer understand the limits of keeping when interacting with the public. It is important to always be open-minded and not jump to conclusions based on stereotypes. Some veteran cops will tell you that their real job in working with rookies for the first month or two is to keep them from being injured or killed. The bad streets of many major U.S. urban areas are no joke, and police officers can face significant personal security risks. Approaching situations gently and following the lead of the mentor dramatically reduces personal safety risks for inexperienced officers. You get an introduction to the paperwork's requirements to work as a police officer at the academy, but the reality of the daily forms and reports doesn't really suck in until you've been doing it for a few weeks. The police papers must be both detailed and accurate, as accurate police reports are the basis for both successful investigations and criminal prosecutions. Mentors usually guide beginners on the specific expectations of different types of paperwork. Some silly pranks off-hours notwithstanding, real hazing is relatively rare among police officers. A strict, no-nonsense approach, however, is typical. According to Massachusetts State Police field training officer trooper Thomas Duncan, we can be tough, but all we're trying to do is help them, so when they're out there all alone, they know what to do."
